WORK EXPERIENCE

Software Engineer | Neo Cerebrum Solutions

Sep 2025 - Present

- Built an Incentive Management System using Next.js and Tailwind CSS, integrated with a Java Spring Boot backend and PostgreSQL database.
- Developed and maintained 5+ rule-based APIs using Actico Modeler, implementing complex business logic and improving system performance.
- Collaborated with 3+ cross-functional teams to ensure timely delivery of project milestones.
- Led a team of 4 members, coordinating development efforts and ensuring quality output.
- Provided support and delivered solutions both on-site and at base location for major BFSI clients.

Software Engineer | DeepArc Tech

Apr 2024 - Aug 2025

- Developed 7+ scalable web applications using Next.js, React, and Tailwind CSS, including e-commerce platforms and portfolio websites.
- Integrated frontends with Python-based backends via REST APIs, ensuring seamless data flow and performance.
- Designed and presented 5+ comprehensive project reports and Gantt charts to define scope, timelines, and requirements.
- Applied and implemented Python and Django to build robust backend systems for full-stack web applications.

PROJECTS

- **News Viewing Website:** A React.js based news viewing web application that fetches data from an open source API and views news categorically. Reduced data retrieval time by 25%.
- **Voice Assitant:** A Python based voice assitant, that take user input from the mic, and performs tasks as specified by the user.

EDUCATION
